Oct-23-2019

Dear Dr. Lalit Dev Tiwari

I invite you to join my group for leading research projects that focus on fine-mapping and studying QTL underlie genotype by environment interactions in plants using genome editing and classic approaches. Our recent published work (Bdolach et al. 2019) showed the effect of the *frp2* wild species QTL on barley circadian clock rhythms and possibly on other developmental traits. In this project you are expected to take any approach deemed suitable to learn the biology behind clock plasticity and its relevance to plant growth and productivity. Within that you will also be involved in developing RECAS9, a new method that aims at directing recombination via CRISPR/CAS9 activity to dissect QTL such as *frp2*. This is a research project led by myself in collaboration with labs from ARO, Open University and Weizmann Institute, which was recently approved for 3-yrs funding by the Chief Scientist of the Ministry of Agriculture.

This offer is for one year of post-doctorate, with the second and third years pending performance. I expect that for the second year in the lab you will apply at for the Israeli-India postdoc fellowship, and I will do my best to assist you with making your applications competitive.

I am also pleased to learn that you have decided to have your wife (Mrs. RICHA DUBEY, Passport no R5079873), and daughter (ARADHYA TIWARI, Passport no R2676805) coming with you on arrival. This should be an interesting time for them and I wish them all the best here. I wish you success in your research and activities here, and hope that we can extend your activities to promote your scientific career, and together extend our knowledge of crop adaptation to changing environments.

Sincerely,

Eyal Fridman
